ABOUT **GATEWAY**

WHO WE ARE AND WHAT WE DO...

Years of experience in electronic article surveillance combined with great design, reliable products and local knowledge with an international perspective – are all parts of the Gateway success.

- Manufacturer and supplier of complete anti-theft solutions for retail
- Made in Sweden
- Extensive experience used to guide you to the best solution for you.
- Comprehensive range of high quality antennas, detachers, deactivation equipment, labels, tags and store management,

OUR **PROMISE**

Amanda
- AT YOUR SERVICE

WHAT WE PROMISE...

When you buy Gateway tags and labels they come with our quality mark. This means they are:

- Fire resistant
- Quality-controlled
- Tested in our own facilities.
- Shock-resistant

To make our tags fire resistant we add a special metal foil on the inside, in combination with a plastic that gives off a distinct smell when exposed to fire. We quality control and test in our own facilities in Motala, Sweden.

The tags are shock-resistant due to a higher quality casing which protects the sensitive components on the inside.

VALUE PROPOSITION

WHY GATEWAY CONSUMABLES

CUSTOMER CENTRIC DESIGN

Years of experience in electronic article surveillance combined with great scandinavian design - produced to meet customer needs - are all parts of the Gateway offering.

RELIABLE AND HIGH PERFORMING QUALITY

High quality and accuracy is Gateways main priority. All our Consumables are "Gateway approved", tested and certified to ensure customer satisfaction.

OPTIMIZED SUPPORT & ORDERING

We support your business both locally and internationally. The advantages of ordering consumables directly from us are that we stock, buy larger batches, have lower shipping costs and general handling.

MULTIGRIP

Gateways Popular Multigrip. Available in 2 sizes, Medium and Large. The Adjustable cables secured packaging of all shapes and sizes.

ABOUT MULTIGRIP

Trigger store's alarm system if removed or if lanyard is cut or tampered with - whether inside or outside the store.

C

MULTIGRIP, LARGE AND MEDIUM

PRODUCT INFO

Art. no:	108077+108039
Color:	Black
Lanyard:	840 mm
Battery life:	Up to 2 years
Suitable detacher:	Multidetacher
Min. order:	200 units

PRODUCT DIMENSIONS

Hight upper:	37 mm
Hight lower:	10 mm
Height:	70 mm

MULTIALARM

It activates the alarm system the same way as a regular tag does. The tag also contains electronics that will make it self-alarming. It triggers when the tag is tampered with or when passing through the alarm system.

A tag which is triggered will alarm regardless of where it is, either inside or outside the store. It will alarm until staff resets the tag.

TAGS

GALAXY TAG & MINI SQUARE TAG

The Galaxy tags and Mini square tag are developed for EAS systems based on RF/AM technology. They are all burn safe with super strong lock and a smooth needle to avoid damage on clothes.

QUALITY PROOFED TAGS

To make our tags fire resistant we add a special metal foil on the inside, in combination with a plastic that gives off a distinct smell when exposed to fire.

We quality control and test in our own facilities in Motala, Sweden.
The tags are shock-resistant due to a higher quality casing which protects the sensitive components on the inside.

GALAXY MIDI RF DARK GREY

 Height: 18 mm

CONCEPT TAGS

The symmetrical design with its convex outer edges and integrated pin and TagHouse makes it virtually impossible to remove it without authorized tools. The Concept Tag fits perfectly on the clothes and provides maximum safety. In other words, it is the world's most advanced and safe alarm tag. Concept Tag is based on the idea of being interchangeable, reusable and disposable.

It is easy to optimize at all levels for advanced production. The garments are secured by the concept tag from production, transport, transit, warehousing and in stores until they are released by the world's most advanced detacher - Concept Detacher.

Built-in RFID chip is available as a supplement. The price of the Concept tag is likely to be lower than your administrative costs for your current alarm tags and works with existing EAS systems. No investment in new technology is necessary.

WHAT?

The world's safest alarm tag. Has a combination of two locking techniques - magnetic and mechanical and resists a pressure of up to 75 kg. Available with AM or RF technology.

Can not be opened with other detachers than the Concept detacher, which means that all stolen or home-made detachers become.

WHY?

With a proven decrease of 66%, Concept Tagen becomes more affordable than other alarm tags.

No buddy prices can be given, only scanned / registered goods deactivate the alarm tag.

TO WHO?

For everyone who experiences problems with shrinkage, both internally and externally.

By investing in safer alarm tags, you reduce your overall waste costs.

A good idea if you have several stores is to start by introducing Concept Tag into one of them and then measuring the difference yourself.
